Lean European Open Survey on SARS CoV II Infected Patients

Studying SARS-CoV-2 collectively

LEOSS in a nutshell – study concept

Study design	Multi-center non-interventional prospective cohort study
Inclusion	<ul style="list-style-type: none"> • Patients with confirmed SARS-CoV-2 infection by PCR diagnosis of any age and disease severity • In- and outpatient context • Available basic medical information (patient's history, initial diagnostics) • Including patients incapable of giving consent: anonymous data collection where no informed consent necessary • Retrospective inclusion of patients treated before initiation of study possible
Data collection	Retrospective and strictly anonymous documentation.
Primary objective	To identify independent predictors of outcome in patients with diagnosed infection by SARS-CoV-2

LEOSS in a nutshell – contributing network

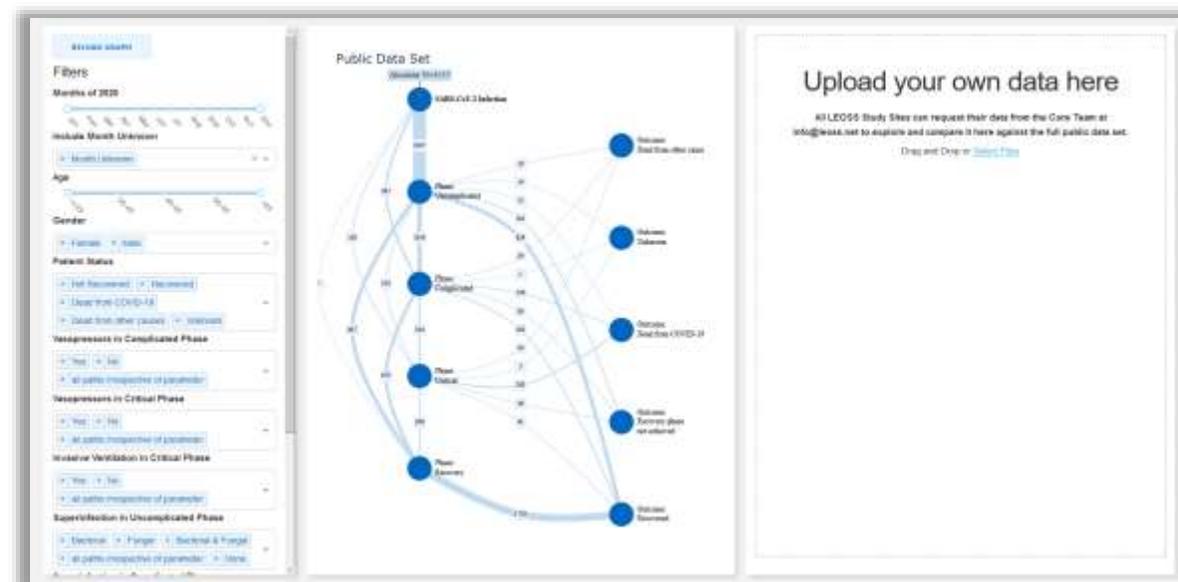

LEOSS in a nutshell – contributing study sites

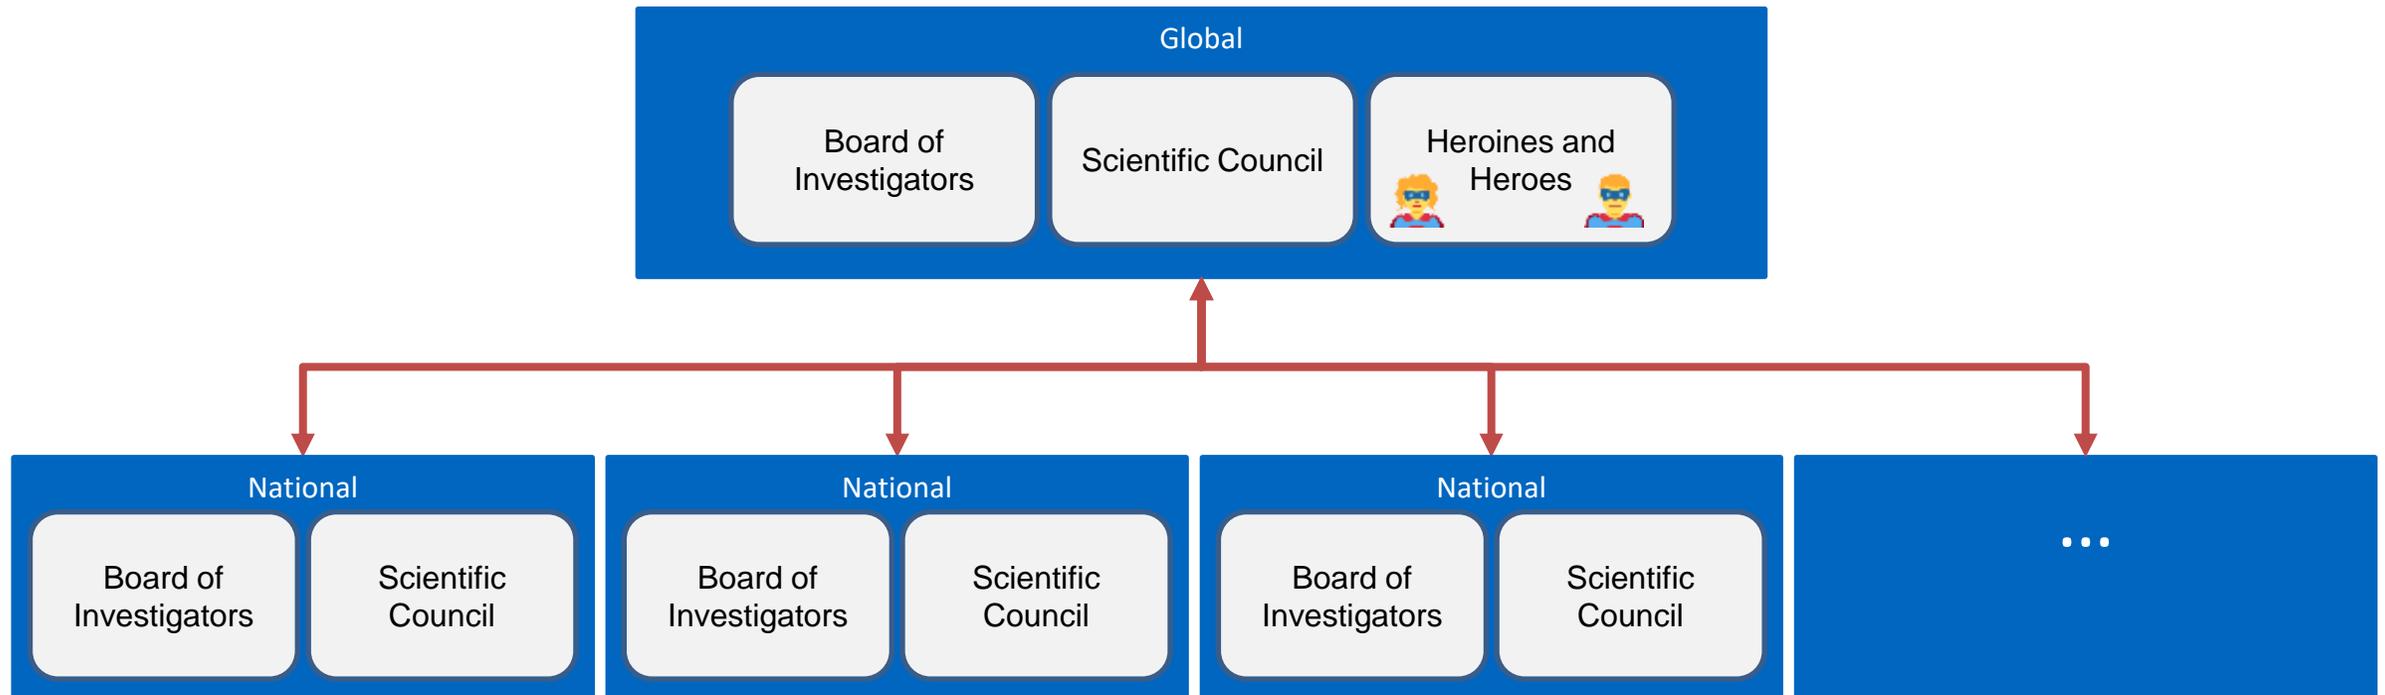

LEOSS in a nutshell – real time data output

- Reduced Public Use File (PUF) provided on the website
- Full local dataset available for the respective study site
- Scientific use file (SUF) according to our Data Use and Access Policy
- Online dashboard for picturing basic disease course and corresponding patients' characteristics with possibility to benchmark your local dataset
- Real-time analyses on the website

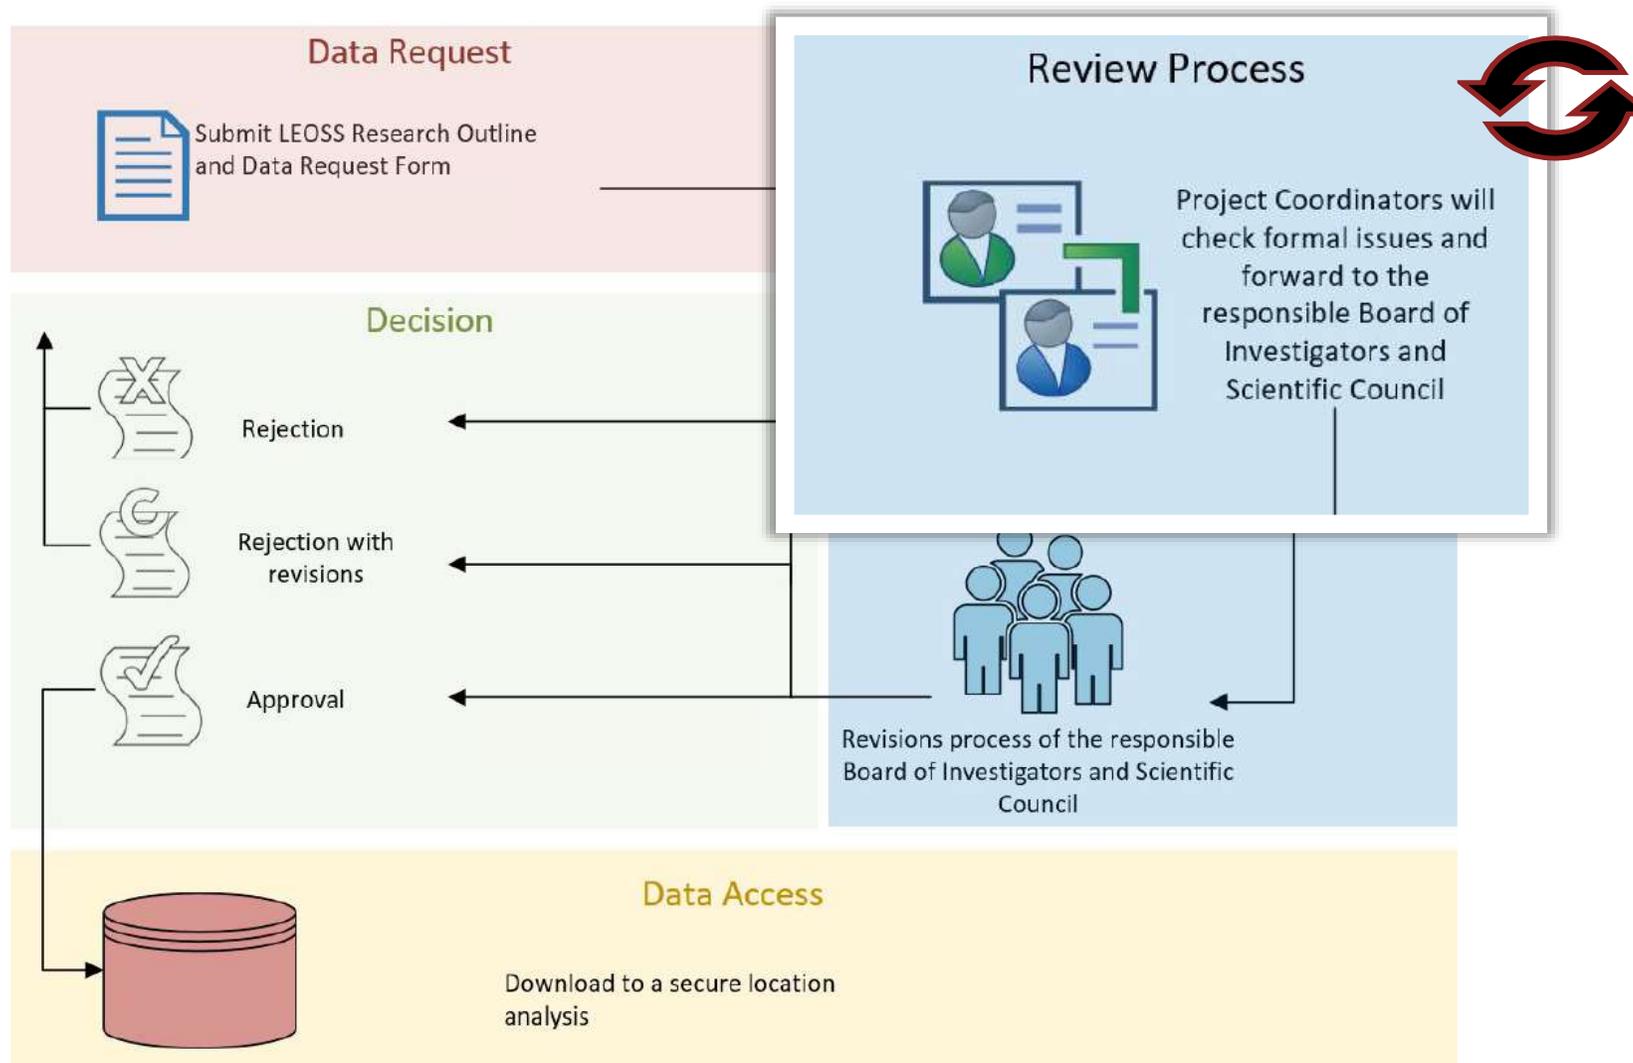

LEOSS in a nutshell – community based governance structure

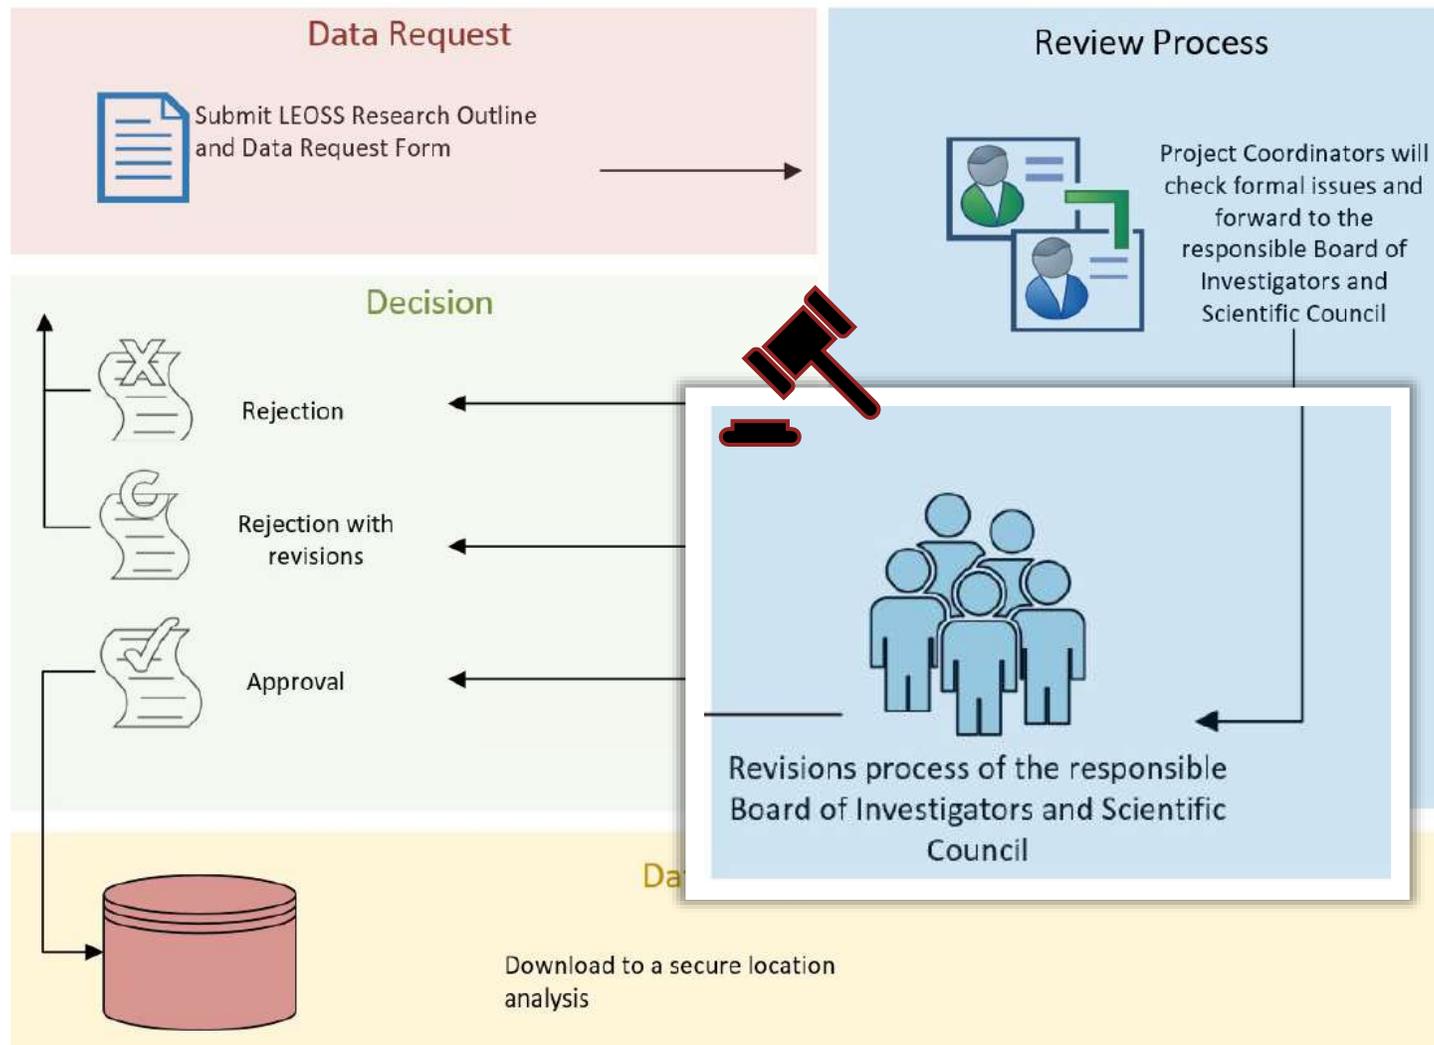

- Board of Investigators (BoI)
 - ✓ 2020-04-16: 1st meeting BoI
- Global Scientific Council (GSC)
 - ✓ 2020-06-03: 1st meeting GSC

Next steps

- Inform yourself: <https://leoss.net/>
- Register your study site: <https://leoss.net/registration/>
- Contact us for supporting you in getting your site ready for the study: info@leoss.net
- Get authorities on board: check your local laws and requirements (e.g. approval of local ethics committee, institutional review board and/or any other entity)
- Set up your team
- Inform and educate your team

... start contributing to LEOSS 😊
