Lean European Open Survey on SARS-CoV-2 Infected Patients

Studying SARS-CoV-2 collectively

Inclusion criteria

–   Patients of <u>all ages</u>
–   In- and outpatient context
–   Patients with (PCR) confirmed SARS-CoV-2
–   Available <u>basic medical information</u> including patients' history, an initial blood sample and outcome data
–   Possibility to include patients incapable of giving consent: anonymous data collection where <u>no informed consent necessary</u>

Registration

–   On our website: https://leoss.net/registration/
–   Join as study site coordinator (PI) / documenting staff / data-scientist / supporter
–   <u>Brief introductory call</u> in case of being new to LEOSS: info@leoss.net
–   Within few working days with access to the study-platform
–   <u>Approval of local ethics committee:</u> Before starting recruiting you have to make sure to meet local laws and requirements (you may need to have an additional approval of <u>your</u> local ethics committee, institutional review board and/or other entity).

Documentation

–   Access to the study-platform: https://leoss.net/login/
–   <u>No parallel</u> documentation with one account: risk of losing entered data
–   Accounts are personalized to a mail address not to the study site
–   Transparent tracking of eCRF changes: https://leoss.net/documentation-changelog/

Data use and access policy:

–   Public Use File (PUF) with limited data items available on website: https://leoss.net/data/
–   Current metrics and statistics available on website: https://leoss.net/statistics/
–   All confirmed sites can request their full local dataset: analysis@leoss.net
–   <u>Community based governance:</u> participation in Board of Investigators (BoI) after having reached a certain threshold in recruitment (more details in Data Use and Access Policy: https://leoss.net/)

Support:
