

Lean European Open Survey on SARS-CoV-2 Infected Patients: Identify independent predictors of outcome in patients with diagnosed infection by SARS-CoV-2.

### Inclusion criteria:

- Patients of all ages
- Hospitalized patients and patients who are being treated by general practitioners
- Patients with (PCR) confirmed SARS-CoV-2
- No informed consent necessary: Children / unconscious / dead includable

### Registration:

- Got to [www.leoss.net](http://www.leoss.net) -> Menu -> ✨ Join us ✨
- Join as study site coordinator / country coordinator / protocol writing team / documentalist / data-scientist / supporter
- Within 24h added to: Chat-Platform, Mailing-List, Documentation-Plattform

### Documentation:

- Registration: see above - Access: [www.leoss.net](http://www.leoss.net) -> Menu -> Login eCRF
- Parallel documentation only with multiple accounts.
- Seeking help of medical students / other staff is highly encouraged
- Important: laws and relations may require you to have approval of an ethics committee, institutional review board and/or other entity.

### Study agreements:

- All confirmed sites get access to the full scientific data set
- No publication without prior communication with the core team (more details protocol item 8)

### Continuous updates:
